## PROFILE

Highly motivated Frontend Developer with a strong foundation in React.js and JavaScript seeking an entry-level position and Internship also. Built a user-friendly task management application using React, demonstrating skills in crafting intuitive UIs. Eager to contribute my coding skills and creativity to a collaborative team, building engaging and efficient web applications while continuously expanding my skill set in the field of frontend development learning and growing.

## PROJECT

### PORTFOLIO

<https://myportfoliowebsite05.netlify.app/>

- **Portfolio Website Development:** I created a personal portfolio website showcasing my projects and reflecting my identity. Utilized React components to manage the website structure effectively.
- **Technical Proficiency:** Enhanced proficiency in React and JavaScript, deeper understanding the React how its working.
- **CSS Skill Enhancement:** Improved CSS skills by applying various animation styles for a visually appealing design
- **Responsive Design:** Ensured seamless responsiveness across all devices and screen sizes.
- **React Router Implementation:** Employed React Router for client-side routing, enabling smooth navigation between different sections of the website without page reloads.

### TODO LIST WEB APP

<https://todolistwebapp05.netlify.app/>

- **Intuitive User Experience:** Added, edited, deleted, and tracked task completion for seamless task management.
- **Persistent Data Management:** Leveraged local storage to ensure tasks remained saved across user sessions.
- **Responsive Design:** Ensured optimal viewing experience on all devices for broader accessibility.
- **Increased Productivity:** Features like adding, editing, deleting, and marking tasks complete streamline workflow and focus.
- **Modern Development Practices:** Utilized React hooks (useState, useEffect) and libraries (FontAwesomelcon) for efficient development.
